

Get high speed point-to-point low latency connectivity for critical applications

Ethernet Internetworking Priority service from Bell

A growing number of your end customers are demanding point-to-point connectivity to support low-latency, time-sensitive applications such as data storage, business continuity, imaging and financial trading.

Ethernet Internetworking Priority (EIP) service from Bell offers a high bandwidth and low latency Ethernet point-to-point connectivity service based on Global Metro Ethernet Forum EPL standards. This service is delivered over our Next Generation Optical Network and provides a standard Ethernet customer interface with stringent performance and reliability attributes to support low latency applications.

Solution

EIP offers point-to-point connectivity with dedicated bandwidth and Ethernet protocol.

- Largest all-optical network delivering high speed services and diversity options
- Point-of-presence (POP) to POP backbone connectivity
- High speed transfer of real-time applications
- Interoperability with our complete portfolio of services, including our Internet Connect service and IP VPN services for a single provider solution
- Elimination of bottle neck risks with mission critical applications that require low latency and high bandwidth

Features

- **Speed:** EIP speeds of 150 Mbps to 10 Gbps
- **Diversity options:** Protected or fully diverse service that ensures service availability, suitable for mission critical applications
- **Availability:** It is available in all Canadian major cities, across the country (metro, regional and national) and at some major U.S. Carrier Hotels in cities such as New York, Chicago and Seattle.

Benefits

- Speed, efficiency and traffic management flexibility with the simplicity and cost savings of an Ethernet interface
- Transparency: customers have the ability to control and manage VLANs and Class of Service
- Support: 24/7 network monitoring and helpdesk
- Low cost: unprotected service with no demarcation device

About Bell Wholesale

Bell Wholesale provides national and international clients industry-leading voice, broadband and IP wholesale solutions from across Canada and from key points in the United States.

We understand the needs of our clients who come from a variety of markets: inter-exchange carriers, local exchange carriers, wireless service providers, resellers, Internet Service Providers, telcos and cablecos.
